WILD LIFE NURSERIES

Insures You Better Hunting and Fishing

Oshkosh, Wisconsin

Dear Fellow-Sportsmen:

This letter is to inform you that the WILD LIFE NURSERIES has taken over the "TERRELL'S AQUATIC FARMS & NURSERIES". This is the reason that some of you are receiving our folder for the first time. We are placing all of Terrell's customers on our mailing list and you will receive our folder and current price list every Spring and Fall, just before the planting seasons.

The Wild Life Nurseries is now in a better position to furnish its customers with more and better planting materials, also adding the 69 years of Terrell's actual surveying and planting experience behind our 30 some years of operation. So if you want the best, place your order with us, we furnish you only TOP QUALITY planting materials, the best in the world, backed up by years of experience and expert service. Our foods are GUARANTEED-TO-GROW.

ORDER WITH CONFIDENCE . . . and don't hesitate to ask for any further help or information you may need. Let us help you, as we have helped thousands of other Sportsmen, make your property a favorite stopping and feeding grounds for a lot of ducks and other game. REMEMBER . . . the experience of two game food nurseries is now at your service . . .

WILD LIFE NURSERIES and
TERRELL'S AQUATIC FARMS & NURSERIES
now operating as

WILD LIFE NURSERIES

Complete Line of Natural Foods for Wild Waterfowl, Upland Game Birds, Fish and Muskrats!!!

Write Us About Your Planting Problems --- Expert Help and Advice

Plant Foods This Spring . . . That Will . . . Provide Ducks This Fall

An important Duck food, as well as Geese, Quail, Doves and Upland Game Birds. Thrives throughout the U. S. Plant on mud flats, lowland areas left bare as water recedes during Summer. Excellent where land can be drained and flooded. Also grows on uplands wherever there is enough moisture to grow a good garden. Grows quickly, can be planted late, provides grazing for waterfowl two weeks after planting, produces seed in less than 60 days. **GRADE A-1 SEED.**

Write for special price on ton lots

Finest Quail food known, also for Doves, Wild Turkey and other Upland Game Birds. Excellent Duck food when planted in shallow water or in marshy places around ponds and lakes. Plant from Illinois Southward on most any type soil, but thrives best on moist, heavy lands. Makes wonderful cover. Sow 20 lbs. per acre.

Will grow in few inches of water, but to start bed, it is better to sow seed on moist to wet soil. Stands flooding and drought. Sow 25 lbs. seed per acre in fresh or moderately brackish areas.

Excellent food for Doves, Quail, Wild Turkeys, etc.. Good duck food when planted near water or flooded after maturity. Drop tubers in rows like corn, or broadcast and drag in on sandy soil. Plant in South only.

Excellent food for Wild Ducks, Pheasants, Woodcock and Snipe. Grows on moist or dry soil, stream banks, swales, bogs, watersides. Ornamental — attractive purple flower, red berries.

Marsh Duck Food and Cover (4½ to 5 ft. high) producing an abundance of seed that comes closest in Nature to resembling "good old yellow corn". Grows in moist soil or in 3 ft. of water. Plant 1000 roots per acre.

Ornamental — also valuable duck, fish and muskrat food. Plant in 1 to 3 ft. fresh water, soft bottom. Our Lotus seeds are treated to assure quick germination.

Excellent Marsh Duck Food. Not only attracts Wild Ducks but also Geese, as all varieties of waterfowl are extremely fond of the crisp tubers produced by this plant. Plant in moist soil along shoreline in water up to 1 ft. depth. Plant 1000 tubers per acre.

Low cover and abundant seed producer. Favorite Marsh Duck Food, grows in sandy soils along lake shores, streams or marshes. Prefers less than 2 ft. of water. Plant 1000 per acre.

For planting on marshy soil, shores, shallow fresh or mildly alkaline water. Withstands flooding and drought well. Plant 1500 per acre.

Excellent Wild Ducks food for brackish and alkaline waters. Grows submerged. Plant in 1 to 6 ft. water, preferably on soft mud bottom. Plant 6 bu. per acre.

Excellent duck-coaxer, especially for acid, shady areas, also suited for tide water areas. Grows in swampy lands and to 1 ft. of water. Plant 10 lbs. per acre.

Fine cover and blinds, providing some food for Ducks. Plant 1500 roots per acre, in marshy meadows, salt marshes, along dikes, banks.

Furnish Duck cover and Muskrat food and cover, growing 7 ft. high in hard or soft bottom soil. Ideal to plant around blinds for cover.

Soil-binder, retards erosion and washing of shores, banks, dams. Sow on banks, shores, moist lands or well-drained land. Food for muskrats . . . cover for ducks. Sow 6 lbs. per acre.

Important cover plants for waterfowl, providing nesting sites. Finest natural food plant for Muskrats. Grows in low, marshy, muddy areas, much the same as Bur Reed. Plant 1000 per acre. Valuable shoreline plant.

Produces an abundance of seeds which all species of Wild Ducks eat. Favorite for Mallards, Blacks and Sprig. It thrives on strongly saline or alkaline flats, low ground, marshy places without much water. Plant 4 bu. per acre.

The tubers this plant produces in abundance are favorite foods of the Bluebills and other Diving Ducks. Grows in 1 to 3 ft. of fresh water, on soft mud bottom, slow flowing streams, ponds, lakes and marshes. Plant 1000 per acre.

Ornamental — Bluebill, Teal and 17 other species of Wild Ducks feed on the seed produced. Plant in 1 to 3 ft. of water, preferably on soft mud bottom. Plant 750 tubers per acre.

Quick-growing — reproduces rapidly and withstands a lot of feeding by a lot of Ducks. Makes food soon as sown in water, grows year after year. Does not root in soil, but floats in water over any kind of bottom. Scatter among reeds, rushes or flooded brush. Scatter 12 bu. per acre.

Seeds are excellent food for Ducks. Stands wave action, protects dams, banks, eroding shores, checks silt movement. Grows 5 to 7 ft. high, making excellent blinds, cover for waterfowl. Plant 1000 per acre in 6 in. to 4 ft. of water.

Excellent shelter for game Fish, harbors the aquatic insects and animal life fish eat. Ducks eat seeds and foliage. Plant in fresh water lakes, ponds and streams over any type of bottom and any depth of water. Plant 12 bu. per acre.

Most famous of the Natural Duck Foods. Grows in a few inches to 3 ft. of fresh water, with sufficient change to prevent stagnancy. Will not grow in water salty to taste. During our years of experience we have perfected the BEST METHODS of handling, storing and shipping Wild Rice, so that its highest germination is preserved. "WILDLIFE" Giant Wild Rice seed is harvested when FULLY RIPE, is expertly handled and stored in our special moist cold storage, in the same state and at the same temperature as in Mother Nature's winter storage house. It is this expert care and handling of our seed, that protects its high germination and insures the successful establishment of luxurious Giant Wild Rice beds. Sow 2 bu. per acre, to insure a strong thrifty bed.

One of the best all-around Duck foods in North America. Canvasback, Redhead, Mallard, Pintail, Black Ducks, Wild Geese, Swan and many other waterfowl eagerly feed on the seeds, tender tubers and all parts of the plant. Food and shelter for game fish. Plant throughout the U. S. and Canada in hard fresh, brackish or alkaline water, 1½ to 8 ft. deep, on sandy or mud soil. Plant 1000 per acre.

The best way to attract more Canvasback, Redhead, Blue-bill and other divers is to establish good beds of Wild Celery — they love to feed on the tender roots, shoots, leaves and large seed pods. Ideal Fish food and cover plant. Plant in 1 to 8 ft. hard fresh or slightly brackish, fairly clear water, on sand or coarse silt, fertile bottom. Plant 1000 per acre.

For salt marshes, low areas where the water is brackish — stands salt water tides. Plant 1000 per acre.

All parts of plant eaten by many kinds of Ducks. Grows submerged throughout the U. S. and Canada, in hard fresh, brackish or alkaline water a few inches to 30 ft. deep (depending on clarity of water). Excellent for Fish. Plant 5 bu. per acre.

Three time winner, Mr. Maynard Reece of Des Moines, Iowa, sets a new record for the number of times one artist has won the annual competition. The stamp will have a black and white wash drawing featuring a Black Labrador Retriever carrying a Mallard Drake. The fee also has been raised to \$3.

**HARDY, EASY TO GROW PLANTS — GROWN TO SUIT YOUR
CLIMATE AND WATERS — GUARANTEED TO GROW!**

MORE FOOD MEANS MORE GAME!

Now is an ideal time to plan your feeding grounds. Plantings made this Spring will produce crops of food for Ducks and other Wildlife this Fall. We have helped many Sportsmen, Hunting Clubs and Game Commissions throughout the U. S. and Canada make their places favorite stopping and feeding grounds for Wild Ducks. Areas that a few years ago were worthless waste places, now planted with our NATURAL DUCK-FOODS, are attracting thousands of Ducks that swarm in to feed on the ripened grains and seeds, tender roots, tubers and shoots, as well as the crisp foliage of these NATURAL food plants.

On other pages we list the favorite natural foods of Wild Ducks, Wild Geese, food and shelter for Fish, and other Wildlife. We supply both Northern and Southern grown plants, plants for fresh hard and soft waters, salt, brackish and alkaline waters, a complete line, something for all conditions and all localities.

Order now . . . use order blank enclosed, and we'll send you GRADE A-1 planting materials and complete planting directions at proper planting time. Our prices listed are all prepaid, no other charges are made.
